Subject: **Main Street (Highway 35) and McHard Intersection: Temporary Lane Changes**
Monday, January 30, 2012

Monday, Jan 30, 2012 TXDoT and their Contractor will switch the temporary lane changes at the intersection of Highway 35 and McHard. Monday morning eastbound and westbound traffic will be shifted to the northern half of the intersection on the new pavement. At this time the southern half of the old intersection will be demolished in preparation for the new pavement which will follow immediately.

As with the previous phase, the new pavement will use a fast curing concrete that will allow traffic to be returned within 4 days of the pour. Weather permitting, the full new intersection pavement should be complete by the end of the week and all traffic returned to normal positions. Please exercise caution entering the intersection during these lane changes. The contractor will be working to make these changes as quickly as possible in order to return traffic patterns to normal. Workers, equipment and materials suppliers will be working in close proximity to traffic lanes and may require momentary delays to traffic crossing through the intersection.

The work pattern established at this intersection will be repeated at each of the intersections and median crossings as the work progresses towards the south TxDoT apologizes for the delays this work has and will cause but this is the most effective means of reconstructing an operational intersection..

As always, the City urges drivers to be alert to these changes and exercise caution in these areas as this work is being performed.

The City will make every attempt to keep the citizens informed of these developments as they develop.
